

CURRICULUM

Diederik Kruiniger, Interaction Designer & Front-End Developer

I am a driven personality who likes to go to any lengths to create a good product. Due to my curiosity and innovativeness, I often discover new ways that lead to solutions to a problem. I set the bar high for myself and I know how to take my responsibility.

I feel at home in an ambitious and dynamic working environment where employees work together as a team in order to achieve an optimal product.

Competencies

WORK EXPERIENCE

Nov 2021 — Jul 2022

Interaction Designer & Front-end Developer

CM.com Conversational UI

Leading a separate project to connect various software solutions within one conversational user interface for customers.

Setting up a plan of approach and connecting stakeholders. Doing research in order to design the user interface (wireframing, visual design, e.g.), and front-end development of the the interface.

Jul 2020 — Jul 2021

Front-end Developer

Perplex Digital Agency

Main focus on Webdevelopment with a little support on Webdesign and Visual Design.

Building the front-end of websites on the Umbraco CMS from zero to hero. Adding new features to existing websites. Building front-end applications using VueJS by making API calls. Creating interactive components. Performance optimization. Making websites accessible (W3C compliant). And improving the over-all user-centered design process.
